**79-82 KITS**

**76-82 Owners Please Read before ordering**

The main determining factor in selecting these 76-82 kits is the radiator's thickness i.e. 2" thick or 2 5/8" thick. Those Seal Kits that specify A.C., L-82 or Heavy Duty radiator are usually used with a 2 5/8" thick radiator. The 2" thick radiator usually was used on L-48 or non-A.C. models or those without a heavy duty radiator. Since the radiator in your model may have been replaced with a thicker one or a thinner one -- **Please check** the thickness of your radiator's core before ordering to avoid errors.

Thank you.
